Acquisition Propels Summit Drilling from Regional to National Leader

Ground breaking remediation technology enhances full service environmental capability

BRIDGEWATER, NJ, April 16, 2010, Summit Drilling Company, one of the Northeast's largest environmental drilling companies, has acquired Pneumatic Fracturing, Inc. ("PFI") of Alpha, NJ. The merger, which will join the forces of two preeminent firms in their respective fields, was announced by Summit President and CEO, Robert R. Kreilick, Jr.

"This acquisition transforms Summit Drilling, combining mission-critical injection services with a multidisciplinary drilling firm, enabling Summit to deliver on its promise as a full service environmental drilling company," said Kreilick. *"Summit's operation area will expand with the merger as well. With more than 55 professionals and support personnel, combined with the integration of the PFI team, Summit will provide investigative and remediation services on a national level."*

Pneumatic Fracturing, Inc. is a full service environmental contracting firm dedicated to complete and satisfactory remediation of any site that presents unusual challenges. Since its inception, PFI has focused on expediting cleanup of sites that have not reached regulatory levels, source area remediation, targeted cleanup under structures and utilities, and an overall reduction of treatment time and capital costs. PFI has successfully applied their patented Pneumatic Fracturing and Pneumatic Injection technologies nationwide for consulting, Federal government and private organizations. The successful implementation of these technologies has established new industry benchmarks for efficient and effective remediation. *"This merger allows PFI the capacity to capture greater market share and fuel our growth by providing remediation services throughout Summit's extensive customer base,"* said PFI President Deborah Schnell. *"The combination of our experienced teams allows for a positive customer impact by delivering synergistic services at competitive prices."*

Summit's clients include ExxonMobil, NJ Department of Transportation, US Army Corps of Engineers, top environmental consulting firms and the Department of Environmental protection Agency (EPA).

For more information about Summit's industry-leading remediation technology, or extensive array of environmental drilling and sampling services, call 800-242-6648. Summit is headquartered in Bridgewater, New Jersey with regional offices in Delran, NJ, Bethlehem, PA and Sarasota, FL.
